NEW "HOW TO PROPERLY CLEAN A NIKON DIGITAL SENSOR"

WEBINAR & TUTORIAL

Create Dust Free Images

I've created a new training tutorial and webinar about how to clean the digital sensor.

The tutorial has 21 pages of instruction, tips and recommendations for cleaning the sensor. Key points:

- Digital cleaning workflow*
- Three methods for creating a dust test image*
- Recommended tools you'll need to clean the sensor*
- Three step cleaning process*

To accompany the tutorial I've created an instructional webinar. The webinar has been recorded and posted.

It's available for viewing 24/7 by [clicking here](#) > then enter "cleanpixels" (no quotation marks & all lower case) for the password > click > Go.

To download the PDF tutorial [click here](#) then click on the download button for Cleaning a Digital Sensor Tutorial.

Because you have either attended my workshops or are subscribed to my newsletter there is no cost for the tutorial and webinar.

TAKE LOTS OF PHOTOS.
